

BASIC PRECISION RIFLE

6-8 HOURS

((DETERMINED BY STUDENT PROGRESSION))

PRICE

\$300

This course is designed to give all participants, regardless of background, the solid foundation and knowledge required to consistently and safely engage targets at extended distances with a precision rifle. Through consistency and proper mindset, the student will be taught how to select the proper equipment for the preferred shooting activity, set up that equipment, and eventually configure it for use at long-range targets. The course will also cover the fundamentals of marksmanship related to long-range shooting, the environmental factors that involve ballistics, the use of ballistic computers, wind formulas, reticles, and a good understanding of their scope's elevation and windage adjustment turrets.

Be advised that this course will be shot from the prone position, not a seated bench position. Additionally, this course is limited to calibers of .300 Win Mag and below &

The rifle MUST be zeroed before class!
